What is your most valuable asset? If you guessed your home, your car or maybe your retirement plan, you would be wrong. Your most valuable asset is your ability to earn a living, in other words, your paycheck. If you cannot bring home a paycheck, everything other asset is at risk of being lost. We strongly recommend protecting your paycheck against an injury or illness. The good news is that coverage is extremely affordable whether you are a group of employees or an individual.

Retirement Plan Liability

Employers are being held more responsible for the performance of 401K plans. This is called fiduciary responsibility. Employers have the choice of either running the risk of being held liable for the plan or transfer this risk. We help employers eliminate their liability for 401K plans.
